Professional Profile

Motivated Computer Systems Engineering student with strong interest in Artificial Intelligence, Embedded Systems, Cybersecurity, and Smart Technologies. Passionate about developing innovative projects using Raspberry Pi, Python, and IoT technologies. Skilled in problem solving, teamwork, and technology research, with practical experience in smart systems and hardware/software integration.

Education

Bachelor's Degree in Computer Systems Engineering

2024 – Present

University of Sfax — Tunisia

Relevant Coursework:

- Operating Systems
- Digital Systems & Logic Design
- Signal Processing
- Algorithms & Data Structures
- Computer Architecture
- Embedded Systems

Technical Skills

Programming Languages	Python, C, Arduino, Java (Basic), JavaScript, PHP
Embedded Systems	Raspberry Pi, Arduino, IoT Systems, Sensors & Modules Integration, Hardware Troubleshooting
Software & Tools	Arduino IDE, VS Code, Git & GitHub, Cisco Packet Tracer, Proteus, Linux
Networking & Security	Networking Fundamentals, Basic Cybersecurity, VPN Technologies, System Configuration
Engineering & AI	OCR Integration, Text-to-Speech Systems, Smart Device Development, Computer Vision Basics

Projects

Smart Glasses Project

Developed a smart glasses prototype using Raspberry Pi, integrating OCR (Optical Character Recognition), text-to-speech, camera, and voice assistance features. Responsible for software integration, hardware configuration, and system optimization.

WireGuard VPN Security Project

Implemented and studied a modern VPN architecture using WireGuard on a Linux-based deployment. Covered secure VPN configuration, network security analysis, attack demonstration & mitigation.

Embedded Systems & Arduino Projects

Built multiple small embedded systems including LED control systems, push-button interaction, logic circuit implementation, and hardware debugging/testing.

Clubs & Activities

IEEE — Institute of Electrical and Electronics Engineers

Member

2024 – 2025

- Participated in technical competitions and engineering challenges
- Collaborated in team-based projects and group activities
- Attended workshops and events focused on emerging technologies

Google Developer Groups on Campus — FSS (GDG on Campus FSS)

Member

2025 – Present

- Participated in hackathons focused on problem solving and real-world challenges
- Collaborated with peers on innovative tech solutions under time constraints
- Engaged in community events and developer-focused learning activities

Soft Skills

- Problem Solving
 - Fast Learning
 - Teamwork
- Communication
 - Creativity
 - Technical Research
- Adaptability
 - Project Collaboration

Languages
